1993

THE BEGINNING
From a humble garage, a bicycle warehouse is born

1994

EARLY EXPANSIONS
Increasing demand requires a larger assembly plant

1996

THE ROAD TO SUCCESS
Evolution to a limited company

1998

INTERNATIONAL APPEARANCE
Acquiring ISO 9002 certification signals a shift to high quality production in smaller numbers

2004

DEVELOPMENTS, BRAND BUILDING
Export market continues to increase

2008

GEPIDA NOW A KNOWN AND RECOGNIZED INTERNATIONAL BRAND, SPECIAL PRODUCT DEVELOPMENTS
Opening new markets through the development of our own GPDS system

2010-2013

CONTINUING GROWTH AND DEVELOPMENT
We launch our own mobile application, battery charger unit, new painting technology, and GPDS Kit

2014-2016

GLOBAL EXPANSION
New markets for Gepida e-bikes in Australia, New Zealand, Belgium, Ireland, Romania, Spain and Italy. Increasingly, safety becomes the focus of product development. New technologies and product designs appear with rider safety as the top priority. Unique products, like e Cargo bicycles and folding e-bikes start development

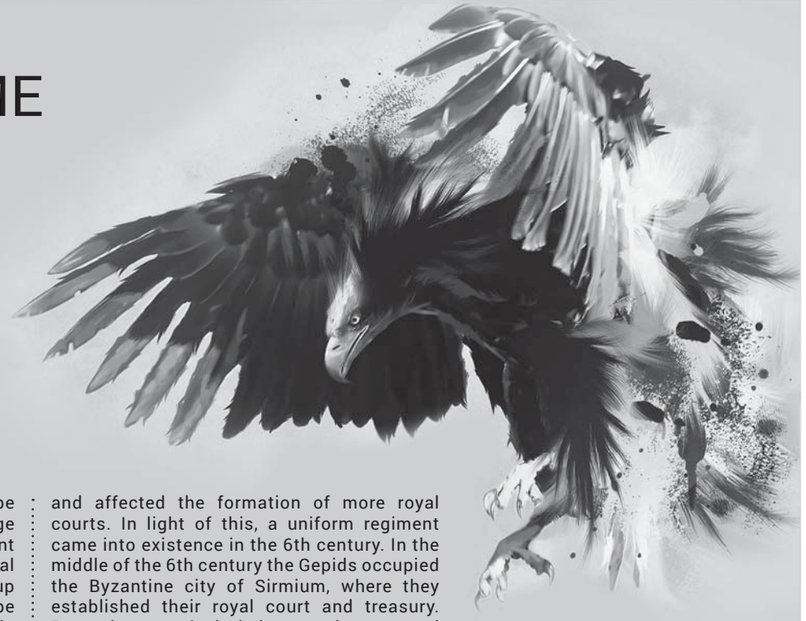
FACTORY STORE
The first Gepida Factory Store opens in in the heart of Budapest presenting the entire product range.

WHY THE NAME GEPIDA?



The Gepids were an East Germanic tribe which who spoke the same language as the Goths, but probably different dialects. The first unequivocal archaeological traces of this ethnic group come from the 2nd-3rd century and can be followed up to the estuary of the Visztula River. They were presumably of Eastern German origin, and considered themselves rich and generous. They first appeared in the Carpathian Basin in the 3rd-4th century, around the Szamos,They never interbred and relations between the two tribes was tense.
At times, they had substantial power and they fought the Goths and other ethnic groups for important territories. The Gepids were initially ruled under a federal tribe system and lived in village communities. The real power was held by the folk convention, which was a union of the armed forces. They elected a king only in certain important historical situations. They were conquered by the Huns when the Hun kingdom and empire evolved, but they managed to maintain their self-identity: they become allies of Attila. After Attila's death, the Gepids probably also acquired the Hun kingdom's treasury, occupying significant territories in all directions, and were recognised by the Byzantine Empire. The Byzantine Emperor greeted the Gepids as his ally, and through commercial connections the Gepids became prosperous. Further conquests and defeats, large geo-political shifts and inner power conflicts caused the central power to weaken, and affected the formation of more royal courts. In light of this, a uniform regiment came into existence in the 6th century. In the middle of the 6th century the Gepids occupied the Byzantine city of Sirmium, where they established their royal court and treasury. Byzantium revoked their annual grant and made a confederation with the Lombards, providing them with important territories in the old Goth Pannonia. The two Germanic ethnic groups, the Gepids and the Lombards, fought each other for around 30 years, and the less well armed Gepids suffered defeats against the Lombard cavalry. They lost the Byzantine territories they had occupied, but kept hold of Sirmium, where the first early medieval silver coins of the Carpathian Basin were made. Later on Byzantium breached the agreement with the Lombards as well, and attacked the Gepida territory together with their new allies, the western refugee nomad Avar ethnic groups. The Gepida army suffered a devastating defeat, their king was killed, and their treasury was safely removed to Byzantium, while the population moved to Italy. Under the large-scale Avar occupation, the Gepids were essentially wiped out, with only smaller Transylvanian centres surviving. However, during the 7th century these small groups were all subsumed by other ethnicities in the region. The most significant of the Gepida graves that have been unearthed are in Szilágysomlyó in Transylvania, where the royal treasures – presumably from the reign of the Hun Empire – were buried.

IN LIFE, EACH MUST DISCOVER HIS OWN PATH. OURS IS ONE OF EXPLORATION AND CURIOSITY, OF NEVER GIVING UP. WE HAVE THE COURAGE TO 'SING OUR OWN TUNE'. COME SING WITH US!

With over 100 workers, Gepida has surely come a long way. And though each of us has their own skills and specialties, we all share a passion to explore. "Wanderlust" is in our blood, and you will often find us around the world, on fairs and in shops, a full-fledged brand inspiring cyclists to get more out of riding.
Gepida was one of the first brands to build modern e-bikes and operates today on an international scale with a presence in Europe, the United States and Australia. We cherish our independence for the flexibility to produce a versatile collection of almost 100 models, from e-bikes to special models with a unique, distinctive design that combines technical innovations with high-quality hand built assembly. Our agile manufacturing process is designed to create bicycles that allow for the latest design innovations. That is why we say: Gepida: a small brand among giants. Close to home or far away, in the city or country, off road and on, Gepida bicycles are made to roam. Gepida – proudly designed and built in Budapest, Hungary.

GEPIDA WITH THE **BOSCH EBIKE** SYSTEM

The Bosch ebike system is the leader of ebike systems on the European market. The „tailwind" effect provided by the BOSCH ebike system currently brings momentum to 50 top European brands including Gepida. Engineers of the Bosch ebike system are continuously developing their unique and powerful solutions for the electromobility sector to meet the highest expectations of performance and comfort.

DISPLAY

Purion

Pure + Compact: the 2-in-1 on-board computer
The information you need with the click of a thumb: The new Purion on-board computer precisely operates with maximum efficiency, featuring a display that clearly shows the most important information.

Intuvia

Clever and clearly arranged
Intuvia guarantees easy and intuitive control of your e-bike with a viewing area that remains clearly visible under all lighting conditions. The separate control allows you to keep your hands safely on the handlebar while guaranteeing a clear view of riding data at all times. The shift recommendation feature makes sure you always pedal in the right gear to extend battery range.

Nyon

The first all-in-one on-board e-bike computer
Nyon is more than just a computer for your e-bike, it is e-bike connectivity for the next generation. Together with the Nyon online portal and app, with the on-board computer you can retrieve all the information you need when you need it, whether GPS navigation, range information or personal fitness analysis. Nyon is now available as a retrofit kit for e-bikes from the Performance Line, Performance Line CX, or Active Line from 2014 models onward.

BOSCH
Invented for life

DRIVE UNIT

Bosch ebike drive systems are designed for maximum ergonomics. The compact gear arrangement allows for optimal integration of the Drive Unit into the frame design, giving you more ground clearance. The reduced volume makes the drive more lightweight. Due to the precise motor control and the rapid processing of sensor signals, the Drive Unit is optimized for minimal noise and vibration. The secure chain run helps to keep the chain from being disengaged or subjected to undue strain. This reduces wear and maximizes comfort. In addition, the Drive Unit is extremely sturdy thanks to the integrated rock guard and spray water protection.

NEW development

BOSCH ACTIVE
BOSCH ACTIVE PLUS

Active Line - the harmonic ebike system
With the Active Line Bosch provides versatile and customized products for modern e-bike users. The cyclist can cover greater distances and achieve increased mobility everyday with the available "tailwind" effect. The Active Line is ideal for leisure, urban and touring cyclists.

New Naming of GEN3 Drive Units	Active Line	Active Line PLUS	Active Line
Weight	approx. 3,1 kg	approx. 3,3 kg	<4 kg
Torque	approx. 40 Nm	approx. 50 Nm	50 Nm
Speed	25 km/h & 20 mph	25 km/h & 20 mph	25 km/h & 20 mph
Q-Factor	175 mm	175 mm	175 mm

BOSCH PERFORMANCE

Performance Line - the sporty ebike system
As the name suggests, the essence of this system is pure performance. Created for athletic cycling, the performance line is built for acceleration: whether uphill or on flat terrain. Thanks to the precision engineering of the system, the assistance from the drive unit is combined with the performance of the rider in the most harmonic way – providing support on all terrain at any speed range.

BOSCH PERFORMANCE CX

Performance CX Line - the model for high performers
This all new e-bike system introduced to the market in 2016 is designed to meet the needs of those who want to take their ride to the next level. The Performance CX line is a high-performance system with up to 300% support from the drive unit, featuring a rugged and compact design, concentrated power, and an extremely durable powder coating.

	Performance Line Cruise	Performance Line Speed	Performance Line CX
Torque	63 Nm	63 Nm	75 Nm
Speed	25 km/h & 20 mph	45 km/h & 20 mph	25 km/h & 20 mph

BATTERY POWERPACK & POWERTUBE

With unrivalled energy density, BOSCH batteries are designed to be the lightest e-bike batteries available. So light in fact, that it is practically negligible during riding. Thanks to the handle and mount, the battery can also be easily inserted and removed or left aboard to charge directly on the e-bike. The Battery Management System (BIVIS) reliably protects your battery against overload, undervoltage, overheating, and short circuits. A long service life with high mileage is something you can count on. Lithium-ion batteries have neither memory nor self-discharge effects which means that the PowerPacks & Powertube can also be partially recharged at any time - without affecting the service life.

New features
POWERTUBE – smooth integration for all purposes making the e-bike system even more invisible – integrated
battery 500 WH Dual Battery option – maximizing the battery capacity up to 1000 WH, see Gepida Cargo

NEW FEATURES FOR 2018

Integrated gear shifting on the go with eShift

The eShift integrated shifting solution for e-bikes not only makes gear shifting easier, it enhances safety by not having to operate any gear shifting components on the handlebar while riding. eShift also optimizes range, ensuring that the gear speed is always within the optimum gear ratio.

SHIMANO DI2

Shimano introduced their first electronic shifting system (Dura Ace 7970) in 2008. This was revolutionary at the time for racers and customers who were open to the idea of a new system.
In 2011, Shimano added an electronic Ultegra set which increased the popularity of the Di2 system overall. Based on customer and market feedback the range was expanded and developed. In 2016, non-performance-oriented riders could also take advantage of electronic gear shifting for the first time.
Thanks to the nexus Di2, upper middle range city bike users can also enjoy this new kind of shifting. The new Di2 system which has already proven its success in professional cycling is also ideal for everyday use: it is compact, precise and easy to operate – enhancing the cycling experience for everyone.

Here at GEPIDA, we also wanted our customers to take advantage of this advancement in shifting technology and built this system into the Reptila 1000 Di2 model, for everyone open to the idea of smooth and fast gear shifting.

Specification
- internal geared hub for Di2 electronic specification
- wider gear ratio with less weight
- gear ratio: 8 speed: 306%
- silent clutch
- increased durability with oil lubricant
- 8 speed: 1,680g

CARGO

The world is constantly changing, which calls for solutions to new ideas and demands that arise every day. We, at Gepida, are determined to provide a sustainable alternative for motorised vehicles that have high emission of C02 and other harmful substances. In addition to satisfying the public's dynamically increasing demand for eBikes, we wanted to develop a product for actors in the industry and other professionals, that enables the transportation of oversized tools and packages that were previously transported by bicycles and scooters. We offer a complex solution to those who want to move cargo efficiently, without pollution, either indoors, or in limited access areas. The cargo makes it possible to work in areas that are difficult or impossible to access by cars. Last, but not least, work will be less like work when using an electric bicycle.

BAFANG

For more than ten years BAFANG has been a leading manufacturer of e-mobility components and complete systems. Thanks to its expertise in the production of systems for e-bikes and electric scooters, the company's products are well received in in Europe, China and the United States. When developing and manufacturing products, BAFANG always puts great emphasis on reliability, quality and longevity.

BAFANG MAX DRIVE SYSTEM

The Max Drive System puts the rider in complete control. In spite of a generous power output and a maximum torque of more than 80 Nm, the motor operates in virtual silence. The modular motor design and integrated controller make disassembly easier and improve service responsiveness. The mid-drive motor constantly samples relevant information at a frequency of up to 80k Hz via a torque sensor and two highly sensitive speed sensors. The resulting data on crank torque, vehicle speed and pedal rotation speed is made available to the controller, ensuring precise control while achieving the highest possible efficiency.

BAFANG FRONT DRIVE SYSTEM

This front-drive motor with inner rotor is compatible with a roller brake and has a rated power of 250W. Because of its inner rotor design and a large reduction ratio (1:11), the motor's power can be effectively released. Small in size, light in weight, high in efficiency, this motor is smooth & quiet when running and thus suitable for city bikes.

SHIMANO STEPS E8000

THE FIRST INTELLIGENT, SILENT AND EASY-TO-USE E-BIKE SYSTEM

Drive unit

The driving force – a compact, light drive unit specially designed for mountain bikes
with a shorter chain stay for better manoeuvrability and more clearance for tires and suspension.
Major power output, 70Nm (max), 250W offering more support for greater climbing capability.
Weighing in at under 3.2 kg lighter than DU-E6001, the E8000 offers easy handling while intuitive e-support gives the ride a natural feel.

CONTROL SWITCH / DISPLAY

Intuitive controls and display enhance natural feel
Power mode change feels intuitive, just like shifting
Ergonomic positioning of switch for mountain biking
Walk assist mode gives you motor assistance to push bike up steps or steep inclines. Customize your cycling computer for smartphone and tablet via wireless programming.

BATTERY AND MOUNT

High-quality, ultra-durable battery
MTB-dedicated design: Iwaterproof
low profile, impact and vibration-resistant.
High, **500Wh capacity** with superb reach.
Ultra-durable battery with consistent recharge
Compatible with E6000 series

CRANK ARM / CHAINRING

The futuristic crankset and chainring have something for everyone.
e-MTB dedicated crank set
Options between a hollow crank arm (XT-compatible) and a solid crank arm (Deore-compatible)
Lightweight and rigid Hollowtech-II type BB axle
Chainring with Deore XT profile
Chain device with options between drive unit direct mount or frame mount.

ACCESSORIES

GEPIDA ORIGINAL ACCESSORIES

For 5 years now we have been offering accessories that match our bicycles in style and quality. We aim to follow this path, moreover, we are proud to present a new assortment for the 2018 season. The new elements and vibrant colours appearing on our bicycles will also be reflected in our accessories.

From the selection of the best materials to the smallest details, we create our accessories so that you can achieve whatever riding goals you have.

When we created our comfortable, but at the same time functional, clothing accessories our goal was for you to forget you are wearing anything at all, to guarantee the most comfortable riding experience.

Whether it's a ride with friends or competition, our goal is always to provide the best kit for riding.

GEPIDA HELMETS

Helmets can save lives, and one should always wear a helmet when riding on the trails or in the city and hot weather cannot be an excuse for not doing so. Due to the ergonomic design and the precise micro-metric adjustment system, our helmet fits perfectly so no compromises need to be made. The detachable and washable anti-bacterial padding channels sweat and dries quickly.

The system of massive vents ensures impressive ventilation with interior channelling not only providing maximum cooling power, but optimal airflow. The interchangeable bug-net protects from insects. Choose the helmet that fits your riding style and type of use best.

LIFELONG WARRANTY ON GEPIDA FRAMES

In the framework of a lifetime warranty, Gepida undertakes to repair or replace the faulty or damaged frames of bikes in a short time by our team or directly through the distributor. Both the expertise of our engineers and high technology of our professional manufacturing can assure a lifetime warranty on the frames of our bicycles. This is why long term durability and simplicity of use is at the core of our product philosophy.

To activate the warranty process, remember to register on our website at the bike registration section. The warranty is validated automatically along with the ownership. Your satisfaction and the joy of riding without any problems for many years to come is essential to us.

GEPIDA FACTORY STORE – THE ENTIRE RANGE OF GEPIDA PRODUCTS UNDER ONE ROOF!

Hungary's leading e-bike producer has opened a new premium category bicycle store in the heart of Budapest.

Gepida, Hungary's leading e-bike producer, has opened a new premium category bicycle store in the heart of Budapest. The idea behind the new store is to directly represent the Gepida factory and present the entire product range in one place, while at the same time offering the highest quality customer service with the largest selection of e-bikes in the downtown area of Budapest.

"We offer quality and a presentation of our product range that is unique and not to be found at any other bike store in Hungary. It's not about a lot of bikes crammed into a shop. It's the way they are presented and the inspiring environment that almost makes you jump on the saddle right away" said György Berkes, founder and owner of Gepida right before the ribbon-cutting. He also talked about his vision of this store, which began 8 years ago. He wanted Gepida to have a brand shop of its own and work started on the factory store 1,5 years ago with his esteemed colleague, Zsolt Rózsa.

Representing the company running the shop, Go Mobility Ltd., Bence Gosztonyi also rejoiced about their dream coming true opening the Factory Store. The shop can serve the needs of a clientele leading the Western European lifestyle. He emphasized the availability of the newest e-bikes and the possibility of a test run at the Gepida Factory Store near Ménesi út – a great testing venue for your new pedelec. It makes trying the Gepida e-bikes mounted with Bosch electric engines in tough testing conditions really easy. Besides bikes, Gepida Factory Store offers Gepida and Topeak accessories, customer service and a (brand independent) bike service station during opening hours all year round.
